

Timbtrack

INTERNSHIP OFFER

Junior Full Stack Javascript Developer

www.timbtrack.com

Funded by
the European Union

Project & Mission

- Implement a Full Stack JS web application that aims to assess companies and service providers using dynamic questionnaires
 - Conduct a study of the specifications and a technical analysis of the project.
 - Divide the project into reusable modules: create the application in the form of modules (authentication module, company management module, user management module, etc.) to be able to use them in other projects.
 - Employ best practices and the appropriate design patterns.
- Assist the Timbtrack team in fixing bugs or developing specific features in the Timbtrack web or mobile application.
